Acknowledgments

The project was delivered in cooperation with the following groups:

BC Wood Specialties Group
Canadian Plywood Association
BC Council of Value Added Wood Processors
Central Interior Wood Processors' Association
Interior Value Added Wood Association
Independent Lumber Remanufacturers' Association
Vancouver Island Association of Wood Processors
BC Log Building Industry Association
BC Ministry of Employment and Investment
Forintek Canada Corp.

This research is possible due to the willingness of the many BC companies to take the time to complete the survey and to share information on their business. These are particularly challenging times for most forest products companies and their cooperation on this project is appreciated. The authors are grateful for the suggestions provided by Dr. Louise Wilson, John Talbot and Dave Shaw.

Funding for this research was provided in part by Forest Renewal BC - a partnership of forest companies, workers, environmental groups, First Nations, communities and government. Forest Renewal BC funding - from stumpage fees and royalties that forest companies pay for the right to harvest timber on Crown lands - is reinvested in the forests, forest workers, and forest communities.

Funding assistance by Forest Renewal BC does not imply endorsement of any statements or information contained herein.

Abstract

The directory contains information on company contacts, products manufactured, species used, and markets served for secondary manufacturing companies operating in British Columbia. Company and product information is presented in an alphabetical listing of companies, a sorting of companies by specific product, and a detailed listing by company sorted by major product category.

The information was collected for the 1999 business year by a direct survey of British Columbia secondary manufacturing. The survey identified 774 active companies involved in remanufacturing, millwork, engineered wood products, cabinets, furniture, pallets and containers, other wood products, panelboards, and shakes and shingles manufacturing. A small number of companies self-classified as roundwood mills are also included due to their product mix.

Keywords: directory, forest industry, value-added, secondary manufacturing

Résumé

Le répertoire contient les noms des responsables, les produits fabriqués, les essences utilisées et les marchés desservis pour les entreprises manufacturières secondaires de la Colombie-Britannique. Les renseignements concernant les entreprises et leurs produits sont présentés dans une liste alphabétique des entreprises, une liste des entreprises pour chaque produit et une liste détaillée des entreprises par grande catégorie de produits.

Les renseignements ont été rassemblés pour l'année fiscale 1999, lors d'un sondage direct auprès des entreprises manufacturières secondaires de la Colombie-Britannique. L'enquête a permis d'identifier 774 compagnies actives dans la conversion qualitative du bois, le sciage, la fabrication des produits en bois, de placards, de meubles, de palettes, de conteneurs, d'autres produits en bois, de panneaux, de bardeaux et de bardeaux de fente. Un petit nombre de compagnies, classifiées en propre comme moulins en bois ronds, sont également inclus à cause de leur mélange de produit.

Mots clés : répertoire, industrie forestière, valeur ajoutée, manufacture secondaire

Introduction

The information used to prepare this directory was part of a project to examine the structure and significance of secondary manufacturing in the British Columbia (BC) forest industry. Based on the primary data gathered via an industry survey for this project, it is estimated that in 1999 BC secondary manufacturing generated just over 20 000 direct jobs and $4.68 billion in sales. This estimation is based on a definition of secondary manufacturing which includes the following business types: remanufacturing, millwork, engineered wood products, cabinets, furniture, pallets and containers, panel products, shakes and shingles, and other wood products.

The Directory of Secondary Manufacturing of Wood Products in British Columbia was completed to complement market development efforts of the BC industry. The forest products sector is increasingly competitive and improved information reduces the risk associated with market development efforts.

In order to complete this directory, an inventory of BC secondary manufacturing companies was developed including names from various industry associations, and from private and public listings. Companies in this inventory were requested to complete a questionnaire.

Not all BC companies involved in secondary manufacturing of wood products are included in this directory. Some companies elected not to respond to requests to participate and to provide company information. Others, despite a concerted effort to develop a comprehensive company listing, may have been missed.

Another report completed as part of this project provides a detailed analysis of the structure and significance of secondary manufacturing in BC. The report, titled The Structure and Economic Contribution of Secondary Manufacturing in British Columbia, 1990-1999 (Information Report BC-X-390) by B. Wilson, B. Stennes, S. Wang, and L. Wilson, is also available from the Pacific Forestry Centre, Canadian Forest Service at www.pfc.cfs.nrcan.gc.ca.

How to use this directory

Company Listings:
This section consists of an alphabetical listing of the companies included in the directory. Each company is identified by name, the company address is provided and the company is classified by business type. The business type classification is based on the company's major product by sales value. Each company is cross-referenced with its page in the company profiles section.

Product Listings:
This section, in a "yellow pages" format, lists the companies under a selection of products.

Company Profiles:
This section, sorted by business type, contains individual company profiles. Each company profile provides the complete company address, a contact name, and information on products manufactured, species used, and markets.
